Storyboard: Tech Inspect

COMP.6210

2019, Semester 1 , Assignment 1

Author: Todd Hopkins

Banner:
When viewing this website from any device viewport width the tech inspect logo will remain easily visible by adjusting itself to fit within the desired area as seen below:

Phone: (320 px wide)

Tablet: (768px Wide)

PC: (1440px plus Wide)

Navigation Buttons:
In this very simple website template, the user can navigate through the website like any other regular website by clicking the appropriate button. The header and footer section will be responsive and will change size to adjust to the viewport width. The user will know what page they are on by seeing that the corresponding button to that page will change colour to show what page they are on. There is also a hover feature which darkens the nav buttons as you hover the mouse pointer over the buttons. Once the user gets to the page, they want they can use the scroll button or mouse wheel to view different content on the page. If the user is on mobile, they can use their thumb to scroll up and down the page.

Phone: (320 px wide)

Tablet: (768px Wide)

PC: (1440px plus Wide)

Primary Content box: Main Article Content
In this template there is a placeholder for what will be reserved for the site's top-quality content or articles. This is where the main reason people will be drawn to the site forward. This article is responsive so no matter what device you view it on it will always look good as picture and text will resize. At mobile size this article will be full width. At tablet and pc size the article section will turn into a column and the image will shrink to a quarter of the size. At the content width will shrink to 70% of the page width.

Phone: (320 px wide)

Tablet: (768px Wide)

PC: (1440px plus Wide)

Secondary Content Box: Location
On the home page in the secondary content box users can see the location of Tech Inspect and use the mouse to move the map around to see where they are located in comparison to other. The map can also be zoomed in and out and can be satellite view as shown below. This secondary content box is for secondary content, this box is also responsive and will change size to adjust to the appropriate the device viewport width. Here are the phone tablet and PC views for this box which is similar to the main content box.

Satellite view:

Phone: (320 px wide)

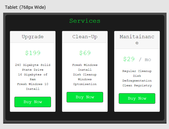
Tablet: (768px Wide)

PC: (1440px plus Wide)

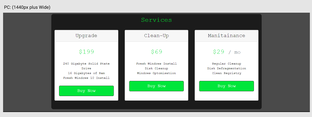
Third Content Box: Services
In the third content box on the home page there will be a services section which will display to the user what services are available from Tech Inspect. The user will be able to click "Buy Now" and be taken to a page which asks them for their credit card details or taken to the forms page to get appointment details. The "Buy Now" buttons represent some of these pages are not available yet. As stated previously this box is responsive and can be viewed on any device. This box will change size to adjust to the viewport width. The services boxes will align themselves vertically in pc and tablet view they will align horizontally as shown.

Phone: (320 px wide)

Tablet: (768px Wide)



PC: (1440px plus Wide)



Template 2, Primary Content Box: Products Gallery
On the products page the user will be able to access a slideshow showing all the latest products from Tech Inspect. The user can navigate the pictures by clicking the left or right arrows or use the circles below the picture. In the final version of this website the product page the user would be taken to another page with all the buy now information. This gallery is fully responsive and adjusts its content to fit the device viewport width.

Phone: (320 px wide)

Tablet: (768px Wide)

PC: (1440px plus Wide)

Template 2 Box 3: Advice and FAQ
On the products page will be an Advice and FAQ Section. This might become a big section and could warrant having its own page but for now it will be a small section on the template. This is where some interesting/helpful articles could be posted and people could leave questions, reply's and helpful advice. This box is fully responsive and will adjust its size and content to accommodate the device viewport width as shown. Below the Phone, Tablet and PC views for this Advice and FAQ box.

Phone: (320 px wide)

Tablet: (768px Wide)

PC: (1440px plus Wide)

Template 3, Primary Box: Legislation
On the legislation page there will be a single page there is only one box to fill on the start of the page. This is because it is designed for all the boring legislations. On this page there will be Tech Inspects privacy act, our mission statement, information about our guarantees act, and legislations about our terms and conditions. This page is fully responsive and will all the legal stuff goes. This page is fully responsive and will adjust its size and content to accommodate for the device viewport width as shown.

Phone: (320 px wide)

Tablet: (768px Wide)

PC: (1440px plus Wide)

Template 4, Box 1: Contact Form
On the contact page there will be a standard contact form where users can leave their name, email, and phone number. Tech Inspect will then be able to keep in contact with their customers and send them articles and newsletters etc. This page is fully responsive and will adjust its size and content to accommodate for the device viewport width as shown.

Phone: (320 px wide)

Tablet: (768px Wide)

PC: (1440px plus Wide)

Template 4, Box 2: Appointment Request Form
There will also be an appointment request form where customers can request an appointment to have their computer looked at or fixed. This form will require the user to fill in their Name, Phone Number, Address, and time requested. This page is fully responsive and will adjust its size and content to accommodate for the device viewport width as shown.
